ELSEVIER

Dynamics of Atmospheres and Oceans 24 (1996) 257–259

dynamics of atmospheres and oceans

# Contents of Volumes 23 and 24

## Special Issue: Stratified Flows

VOL. 23, NOS. 1–4 JANUARY 1996

**Part A**

*Preface* . . . . . 1

**General lectures**

Internal waves and related initial-value problems
J. Lighthill . . . . . 3

Processes in the surface mixed layer of the ocean
C. Garrett . . . . . 19

Some aspects of turbulence and mixing in stably stratified layers
H.J.S. Fernando and J.C.R. Hunt . . . . . 35

Stably stratified flows in meteorology
J.C.R. Hunt, G.J. Shutts and S.H. Derbyshire . . . . . 63

Direct and large eddy simulations of stratified homogeneous shear flows
U. Schumann . . . . . 81

Recent developments in second-moment closure for buoyancy-affected flows
T.J. Craft, N.Z. Ince and B.E. Launder . . . . . 99

*Contributed Papers*

**Instability and turbulence**

Wave packet critical layers in stratified shear flows
S.A. Maslowe . . . . . 115

Secondary instability and three-dimensionalization in a laboratory accelerating shear layer with varying density differences
C.P. Caulfield, S. Yoshida and W.R. Peltier . . . . . 125

Layer formation and transitions in stratified circular Couette flow
B.M. Boubnov, E.B. Gledzer, E.J. Hopfinger and P. Orlandi . . . . . 139

Energy dissipation and vortex structure in freely decaying, stratified grid turbulence
A.M. Fincham, T. Maxworthy and G.R. Spedding . . . . . 155

The long-time evolution of the initially turbulent wake of a sphere in a stable stratification
G.R. Spedding, F.K. Browand and A.M. Fincham . . . . . 171

Some similarity states of stably stratified homogeneous turbulence
J.R. Chasnov . . . . . 183

Inverse cascade in stably stratified rotating turbulence
O. Métais, P. Bartello, E. Garnier, J.J. Riley and M. Lesieur . . . . . 193

On gradient transport turbulence models for stably stratified shear flow
C. Kranenburg . . . . . 205

Decaying stratified turbulence: comparison between a two-point closure EDQNM model and direct numerical simulations
L. van Haren, C. Staquet and C. Cambon . . . . . 217
Heat and mass transfer in a stable thermally stratified flow
S. Komori, K. Nagata and Y. Murakami . . . . . 235
Rayleigh–Taylor stability of a two-fluid system under a general rotation field
L.A. Dávalos-Orozco . . . . . 247

**Internal waves and wave breaking**
The influence of bottom topography on internal seiches in stratified media
M. Münnich . . . . . 257
Interaction and generation of waves in a two-layer fluid flowing over localized bottom topography
M. Funakoshi . . . . . 267
On the three-dimensional internal waves excited in the flow of a linearly stratified Boussinesq fluid
H. Hanazaki . . . . . 279
Internal waves generated by a translating and oscillating sphere
P. Dupont and B. Voisin . . . . . 289
The structure of the turbulent wake and the random internal wave field generated by a moving sphere in a stratified fluid
P. Bonneton, J.M. Chomaz, E. Hopfinger and M. Perrier . . . . . 299
A numerical study of wave-breaking in stratified flow over obstacles
M.F. Paisley and I.P. Castro . . . . . 309
Stratified flow over three-dimensional topography
Y. Kadri, P. Bonneton, J.M. Chomaz and M. Perrier . . . . . 321
Excitation of internal waves and stratified turbulence by parametric instability
D. Benielli and J. Sommeria . . . . . 335
On the breakdown into turbulence of propagating internal waves
P.N. Lombard and J.J. Riley . . . . . 345
Stratified turbulence produced by internal wave breaking: two-dimensional numerical experiments
P. Bouruet-Aubertot, J. Sommeria and C. Staquet . . . . . 357
Vertical mixing of passive scalars owing to breaking gravity waves
V. Schilling and D. Etling . . . . . 371
A numerical study of the breaking of an internal soliton and its interaction with a slope
K. Saffarinia and T.W. Kao . . . . . 379
Steepening of the leading and back faces of solitary internal wave depressions and its connection with tidal currents
A.N. Serebryany . . . . . 393
Dynamics of internal solitary waves in a rotating fluid
O.A. Gilman, R. Grimshaw and Yu.A. Stepanyants . . . . . 403

VOL. 24, NOS. 1–4 JANUARY 1996

**Part B**

**Ocean basins and lakes**

Turbulence produced by internal waves in the oceanic thermocline at mid and low latitudes
M.C. Gregg, D.P. Winkel, T.B. Sanford and H. Peters . . . . . 1
Turbulence decay in stratified and homogeneous marine layers
I.D. Lozovatsky . . . . . 15

Comparison of diapycnal diffusivity measured by tracer and microstructure techniques
A. Wüest, D.C. van Senden, J. Imberger, G. Piepke and M. Gloor . . . . . 27
Wind forcing of internal waves in a long narrow stratified lake
C. Stevens, G. Lawrence, P. Hamblin and E. Carmack . . . . . 41

**Convection, entrainment and mixing**
Turbulent mixing in the oceanic boundary layer caused by internal wave reflection from sloping terrain
D.N. Slinn and J.J. Riley . . . . . 51
Efficiency of mixing by a turbulent jet in a stably stratified fluid
M. Larson and L. Jönsson . . . . . 63
Buoyant surface discharges into unsteady ambient flows
J.D. Nash and G.H. Jirka . . . . . 75
Direct numerical simulation of a vigorously heated low Reynolds number convective boundary layer
G.N. Coleman and J.H. Ferziger . . . . . 85
Streamwise vortices near a density interface
N. Baba . . . . . 95
Turbulent mechanisms in stratified fluids
J.M. Redondo, M.A. Sanchez and I.R. Cantalapiedra . . . . . 107
Experimental study of high-Rayleigh-number convection in mercury and water
S. Cioni, S. Ciliberto and J. Sommeria . . . . . 117

**Intrusions, exchange flows, gravity currents**
Density intrusions with large relative thickness
S.J. Wright, D. Paez-Rivadeneira . . . . . 129
Stability and mixing of a two-layer exchange flow
G. Pawlak and L. Armi . . . . . 139
Exchange flow through a channel with an underwater sill
Z. Zhu and G.A. Lawrence . . . . . 153
Nonlinear effects in the unsteady, critical withdrawal of a stratified fluid
S.R. Clarke and J. Imberger . . . . . 163
Shear instabilities in arrested salt-wedge flows
N. Yonemitsu, G.E. Swaters, N. Rajaratnam and G.A. Lawrence . . . . . 173
Mixing in lock-release gravity currents
J. Hacker, P.F. Linden and S.B. Dalziel . . . . . 183
Mixing at the front of gravity currents
M.H. García and J.D. Parsons . . . . . 197

**Baroclinic vortices**
Nonlinear oscillatory evolution of a baroclinically unstable geostrophic vortex
X.J. Carton and J.C. McWilliams . . . . . 207
An exact, stratified model of a meddy
L.R.M. Maas and K. Zahariev . . . . . 215
Cyclone–anticyclone asymmetry in the merging process
S. Valcke and J. Verron . . . . . 227
Penetrative convection in rapidly rotating flows: preliminary results from numerical simulation
K. Julien, S. Legg, J. McWilliams and J. Werne . . . . . 237

*Guide for authors* . . . . . 251
